Imagine

Imagine you, your children, or your grandchildren, being in a school where your interests are the core of your curriculum; where problem solving and independent thinking are encouraged; where you get hands-on experience and go on field trips; where you learn and play with students of all ages; and you come out with a high school diploma. Our graduates get accepted at top rated colleges with generous scholarships. With your help, we can expand the school, hire more teachers and take in more students, increasing the educational options in the North Country.

Little River Community School, founded in 1999, is an alternative school, serving students in grades K-12. With an 8:1 student/teacher ratio, our students receive individualized attention and the opportunity to direct their own education.

Our student body has grown and we are renovating and putting on an addition to our building this summer. We are adding a new classroom, hiring a new teacher and taking on additional enrollment. This fall we will have 40 students, with 4 full-time teachers and 2 part-time teachers.

The expected cost of the building project is \$74,000 and we have already raised \$50,000. We would like to close that gap by the end of the summer. Contributions of \$100, \$500 or \$1000 will go a long way to providing more students the opportunity to join the Little River experience. In this way we can expand the educational diversity and options in the North Country. Please join us in our campaign to grow our school.

Thank you for your interest and support!
